ABOUT 4DMT : 4 Dimension Molding Technology

**We support manufacturing and service companies
in the molding business.**

4 Dimension Molding Technology is the central media of information and knowledge.
4 Dimension Molding Technology is based on NAVER online community,
“4 Dimension Molding Technology.”(NAVER is the biggest web portal in Korea.)

This community was found in February 2008, and currently, there are over 80,000
members. It has grown into an ideal place to share information and knowledge
about plastic molding technology.

Every year, we hold technology seminars with community members.

Along with the development of our community, we publish a technical journal to
spread professional and organized technical information.

For the development of the plastic industry and the online community, 4 Dimension
Molding Technology is going to reinvest all the profits except operation expenses.
We are going to found 4 Dimension Molding Technology community center, have
technical lectures, seminars and Webinars for education, and consulting service.
